I have read and understand the above and agree to abide by its contents: By my signature below, I agree to have this dog spayed/neutered by no later than _____, and I understand that this spay/neuter agreement is an agreement that this dog will not produce a litter of puppies either as purposely bred or by accidental breeding. SPAYING OR NEUTERING YOUR DOG HEALTH FACTS

Neutering a male eliminates the possibility of testicular tumors and efficiently reduces the chance of prostate problems. Neutering decreases the chance of peri-anal tumors and hernias that are in older, un-neutered males. Neutered males are less likely to escape a yard and find a female in heat. This reduces the chance of them being hit by cars, getting into fights or lost. Females spayed before their first estrous cycle reduces her chance of mammary tumors, ovarian cancer and uterine infection. A spayed female eliminates the unsightly mess of the bleeding during her heat cycle that ends up on your flooring and furniture, and stops neighborhood stray males from coming over or through your fence to breed with her. Males neutered early in life tend to be less aggressive. Neutered males are less likely to mark in the house. A spayed female does not have hormonal mood swings and will make a far superior pet. Get a pet, enjoy your pet, and have them spayed or neutered; it will lengthen their lives in the long run.
